Part 1: News and Infos

1. Radio France International on 7005 kHz with splatters

Radio France International (RFI) on 7205 kHz produced strong splatters down to 7185 and sometimes down to 7180 kHz every evening at about 2100 utc and later. I informed the German PTT BNetzA. The German PTT sent an official complaint to France. HB9CET confirmed my observations and informed the Swiss BAKOM. Many thanks dear Peter!

RFI on 7205 kHz with splatters on April 22nd at 2116 UTC – Screenshot: DK2OM

2. Strong Russian noise floor on 14 MHz

I found a strong Russian noise floor on 14120 kHz center QRG (S9 +40 dB) covering 13960 – 14260 kHz on April 28th at 0900 UTC and later. Location. Area of Moscow – The Nepal emergency frequency on 14205 USB was disturbed! Screenshot: DK2OM

3. Brazilian Cbers on 28 MHz – no change

Brazilian Cbers were daily transmitting on 28000 – 28315 kHz on AM, no change as expected.

4. Bad News – 21 MHz no change

The Russian voice scrambler “Yakhta” was daily heard on 21000 kHz with voice traffic and the inband synchro signal on 21001.5 kHz on F1B mode with 100 Bd and 150 Hz shift. Location: Nizhny Tagil (area of Jekaterinburg) The Australian OTH radar “JORN” was daily operating on 21295 in seeklight mode with different sweep rates. A Chinese long range OTH radar with 10 sps and 160 kHz wide was audible on our 15 m-band.

5. 14205 kHz – emergency frequency disturbed

Uncredible and a shame: The Nepal emergency frequency on 14205 kHz (USB) was often disturbed by fellows shouting “ola”, whistling and transmitting RTTY.

6. Recommendation – if you are interested in Moegel-Dellinger and Aurora predictions

<http://www.swpc.noaa.gov/communities/radio-communications>

Many thanks for the tip to Mr. Jens Mielich from the German Leibnitz Institute in Ruegen!

7. CORRECTION - navigation systems and channelmarkers

A Russian channelmarker on 3756 kHz (location Tuapse – East Black Sea) is audible every evening with pip-tones. Transmission mode A3E – carrier and both sidebands with short tone bursts. This system is not located in Ukraine! Earlier bearings were not precise enough. This system is no navigation system as reported before! The system on 1812 kHz is the navigation system BRAS-3/RS-10 in Kaliningrad – Russia. Many thanks for correction and assistance to A.B. !

8. Hamradio 2015 – Invitation to all coordinators and friends!

IARUMS Region 1 and DARC Monitoring System Meeting at the HAM-RADIO 2015 in Friedrichshafen:

Saturday, June 27th 2015 from 10.00 – 11.30 local time - Room Swiss (180) – Hall A2

Program:

- 1. Official opening by DK2OM and HB9CET
- 2. Main lecture “Monitoring and bearing today” by Dr. Ing. Christof Rohner (DL7TZ / 9V1CR) – Fa. Rohde&Schwarz

Hall plan of the HAM-Radio (source DARC)

ARSK MONITORING OVERVIEW FOR APRIL 2015

Radio Hargeisha remained on 7,120 kHz with broadcasts and what is apparently the Voice of the Broad Masses, Eritrea, on 7175 kHz. They seem to have left 7185 kHz.
