SWL's New Year Contest 2023

This contest, sponsored by the SWL-section of the VERON, is open to SWL-stations all over the world.

The date of this contest is **Sunday 8 January 2023**.

The aim of the contest is: Logging of three sequential hours somewhere between 00.00 and 24.00 UTC on both 80/40 or only on 80 or only 40 meterband.

It is not necessary to start the three hour period at the full hour.

Only **three different** stations from each DXCC country count for the points, no matter the band (see log example).

For the first station you may claim 5 points, the second station 3 points and for the third station 1 point. Thus the maximum score by every DXCC is 9 points.

Only stations in phone are permitted.

The use of **WebSDR** for the logging in this contest is **not permitted**; the SWL should only operate with own receiver and antenna.

The log has to contain following items: Time (UTC or GMT), Band, Heard station, Working station, RS, Points.

Remark: it is not allowed to use the same "working station" more than 10 times!

A participant in the contest herewith agrees with publication by VERON of the results in the monthly VERON-magazine Electron, as well as on the VERON-website and in other by VERON used and/or chosen media.
